

ALL ABOARD!!!

The **Detroit Model Railroad Club** invites you to join us for our spring O Scale Gathering operating session at 104 North Saginaw in Holly, MI.

Saturday, May 17, 2025

The session will begin at 9:00 a.m. with coffee and doughnuts while you tour the layout and get oriented with our railroad. Feel free to take as many pictures as you would like. Around 9:30 a.m. we will gather upstairs in our club meeting room to go over our operating system, our throttles, and to make crew assignments.

Operations will run until about 1:00 p.m. For those who have to get home, we thank you for attending. After a quick break for lunch, those who are still hungry for operations will be able to operate until about 4:30 p.m.

Our club has over 6500 feet of hand-laid track for our 2-rail O scale layout. We run freight and passenger trains with both steam and diesel locomotives using wireless DCC throttles from NCE. Train lengths run from a 2-car RDC to a coal drag nearly 50 feet long. Jobs range from working the large classification yard or switching local industries up through heavy main line operation.

This session is open to anyone interested in railroad operations regardless of scale. Please pass this invitation along to anyone you know who would like to take part. Watching trains run in circles is fun but running trains that have a purpose is even better. No operating experience is required, all you need is an interest in learning about how real railroads work.

See our website at www.dmrrc.org for pictures of our club and its layout. This site also has a map of where we are located. Guest spots are limited so if you are interested in attending this operations session, please register by sending an email to operations@dmrrc.org or call/text 248-464-0206 for more information.
